# DUALTOP ASSISTS AUTO-SLEEPERS TO DUAL AWARDS

Webasto's award winning, diesel-powered DualTop interior and water heater has helped Auto-Sleepers' new Cotswold model to pick up two prestigious awards of its own at the recent Caravan & Motorhome Show: the "2010 Caravan Industry Motorcaravan Award" and the "Thetford Washroom of the year for Motorcaravans" award.

The Cotswold is available as a stylish 2 or 4 berth, low profile design on a long wheelbase Peugeot chassis, with a choice of 2.2litre 130ps or 3.0litre 160ps diesel engines. The DualTop RHA 102 heating system was selected to match the new model's exceptional standards of luxury, as it combines an ultra-efficient hot water boiler with interior space heating and can run off the mains too.

DualTop has high heating power for a very fast warm-up period, but Auto-Sleepers'

design team particularly appreciated the system's ability to be installed in a variety of locations. Couple this with ease of use, autodrain and antifreeze features, a 70°C boiler, plus advanced heating technology for stable temperatures & longer showers and it's little wonder the designers were so impressed.

Auto-Sleepers' Design Engineer Brian Cross summed up DualTop's attraction by saying, "With the new Cotswold range we were keen to create the most spacious interior possible within the vehicle's easily

manoeuvred overall dimensions. The ability to install a really efficient heating system beneath the floor, rather than inside the vehicle, was an important factor in enabling us to achieve this aim."

Auto-Sleepers join a long and constantly growing list of leading UK motorhome manufacturers who are installing DualTop as part of their models' standard specification, in addition to discerning motorhome owners who are upgrading their vehicle's levels of comfort and convenience by retro-fitting the system.
